When a primary bath full of warm tones needed an update, **Savannah Surfaces** worked with Kelly Caron Designs to create a fresh, light and bright bathroom for Palmetto Bluff homeowners who needed a change. They updated the main floor, shower walls and shower floor and created a custom mosaic shower feature wall with Mosaïque Surface to elevate the space with a timeless focal point.

"We listened to the customers' wishes, understanding their desired outcome, to create a fresh and unique space that would coordinate with the rest of their home, as well as the rest of the features in their bathroom," said Jessica Cheek, interior sales manager for Savannah Surfaces. "They opted for natural materials to provide versatility and freshness to the design. The mosaic was custom made. And while the pattern was proprietary from the vendor, we selected the materials to make up the design; the specific color of the glass and stones, the placement of materials and the mixture of honed and polished finishes. These were all details hand-selected to enhance the focal point of the space." LL
